Professional coding language skill

PERSONAL PROJECTS

AI-Based Quality Assurance

- AI-Based Quality Assurance Project is based on a face analysis project.
- This project is mainly focused on Restaurants customers who aren't interested in giving feedback about food that is good or bad.
- Restaurants will get this system. So, that system can detect the face of customers and also can manage the feedback, manage the video, manage complaints and notification and also be sent to create the report about that.
- In this project we use Python Flask As a Backend, And jQuery as a Frontend, also use AI-based algorithms like face detection and CNN, and use Mysql to store all the data.

TravelAdvisor (05/2022 - 06/2022)

- This idea is comes from my experience when i stuck to find the best hotel during my visit to unknown place.(Reactjs+api)(for more information visit this link: <https://dg-travel-advisor.netlify.app/>)

Amazon clone(Crypto payment) (03/2022 - 04/2022)

- Create Amazon-clone ecommerce website with full functionality using mainly reactjs.
- The new features that I provided in this website is in payment section. where i allowed customer to payment threw metamask(crypto payment gateway).
- In crypto payment , For now, all the payment is stored on testnet blockchain(ropstn network). but i focus on stored all the transactions on the main blockchain called polgon which is sidechain of ethereum.
- For more Information visit Link : <https://d2-amazon-clone.netlify.app/>
